

Location Map of Yuma Area Fishing Holes

YUMA AREA FISHING HOLES

There is water in the desert, which provides fishing opportunities. This handout contains the location, facilities, access, and fish species information for several Yuma-area fishing holes. The names associated with these areas are the most commonly used local name (alternate names for some sites may exist) and the mileages to each location are approximations. On the lower Colorado River (below Imperial Dam) flows may be such that some of the launch facilities (both improved and primitive) may not be usable.

Some of the access roads getting to the various fishing areas cross private property, state lands, or Indian reservation lands. It is important to abide by and respect all postings, closures, and permit requirements that may exist. Trash is a growing problem at many of the areas so please leave the fishing spot cleaner than you found it.

These fishing holes all require some type of a fishing license and depending on the area or fish being caught, and additional stamps may be required. License requirements and fishing regulations are available at the Arizona Game and Fish Department office or any license dealer.
